??Grace's Guide is the leading source of historical information on industry and manufacturing in Britain. This web publication contains 132,594 pages of information and 209,978 images on early companies, their products and the people who designed and built them. Waste management systems at source - in the household- is reviewed. • Biological methods are relatively cheap, but their effectiveness is limited. Ultrapure water (also UPW or high-purity water) is water that has been purified to uncommonly stringent specifications. Ultrapure water is a commonly used term in the semiconductor industry to emphasize the fact that the water is treated to the highest levels of purity for all contaminant types, including: organic and inorganic compounds ...
